

Used Fanuc PCB circuit board Axis card A20B-2902-0070

Model	A20B-2902-0070
Brand	90% NEW
Category	Motherboard
Series:	Typically used in Series 16/18/21/0i CNC systems
Function:	SERVO Card / Axis Control Board
Application:	Controls servo motors for machine tool axes
Interface:	High-speed serial bus for communication with servo amplifiers
Feedback:	Handles position and velocity feedback from pulse coders
Technology:	Uses custom FANUC LSI for high-speed processing
Connectors:	Equipped with multiple high-density pin connectors
Protection:	Conformal coating for resistance against dust and vibration

Note:

Invshop recommends that you inquire with the original factory or its agents about the latest production status and technical information about A20B-2902-0070. The product parameters displayed on Invshop are entered by Invshop engineers according to the specifications, and efforts have been made to minimize errors, but we cannot guarantee the complete correctness of the parameters. Please refer to the specification sheet!
